

Support the Bike Scouts community!

The Bike Scouts platform is a good way to do awesome things in the world even when you're busy, when you have responsibilities that just can't wait, or when you don't have enough people around you that would support your passion for good. Bike Scouts is a first-of-its-kind social platform for doing good that also runs the only continuously-operating volunteer bicycle messenger service for disaster response in the world. Bike Scouts has been providing help, hope, and courage for people affected by disasters and circumstance since 2013. Help the Bike Scouts community make awesome things happen with social teamwork!

We have been working and building our community and platform for almost a decade, and in that time we've helped people survive and thrive in some of the most difficult situations through social teamwork as a community - and we did all of this with zero funding and investment. Today, the Bike Scouts has a nationwide membership in the Philippines where natural disasters occur on a regular basis like the category-5 typhoon Yolanda in 2013, and the more recent storms, the Taal Volcano eruption, and the ongoing global pandemic - where people need other people the Bike Scouts are there to help.

We need help, though, to keep our community going. The cost of managing and sustaining a growing community around the Philippines and in 16 other countries without funding, investment, or collecting fees of any kind has grown to a point that we can no longer sustain it ourselves. We are working on a solution to keep the community going but in the meantime we need your help. Bike Scouts is a one-of-a-kind community and social platform where people actually want to do better things for themselves and others. We don't profit from our community, we don't sell data, or get a percentage from other businesses that are most likely struggling as well.

With your support, we can keep the community alive and it can continue to grow and do even greater good wherever there are Bike Scouts.

Why Bicycles?

We use bicycles to build our community and do good in the world because they're the most resilient forms of mobility that are accessible to the most number of people around the world. People ride bicycles to go to work, school, to find opportunity, for health, and experience life while helping reduce the impact of mobility on the planet. Bicycles are simple machines that work and make sense in preserving the future.

Who We Are

Bike Scouts is a Securities and Exchange Commission registered non-profit company in the Philippines. We are a small team of passionate professionals from different fields of work that are relevant to the work and aspirations of the Bike Scouts community. We come from advertising, design, development work, healthcare, and technology that have been working for the past eight years to build a better social platform that actually does good for people and the planet. None of us have received any salary, fees, or allowances in the time that we've been building the community, and we are all fully-committed to continue the work with your support.

Who We Are

Like all other initiatives, we started by using free resources like Facebook and other platforms but with a decade of growth in terms of community numbers and partners we've increasingly had the need to build our own platform such as our website that allows us to have better control of the content, materials, and engagement we have with community members and partner organizations. We also have costs in our real-world operations to bring help to people that need help in the aftermath of disasters and for daily survival in the midst of the ongoing global pandemic. Bike Scouts operated nationwide in the Philippines, 24/7, 365 days in a year. We are the only Volunteer Bicycle Messenger service (or any kind of delivery service) that keeps working even in the middle of a volcanic eruption or a category-5 typhoon.

If you are an investor with a very generous heart and would like to make a difference in the world we are also looking for partners that can help us scale the Bike Scouts' impact to other places around the world where our services might be needed. Please send us an email through [dispatch\(a\)bikescouts.org](mailto:dispatch@bikescouts.org). The world moves forward at its own pace, we are the ones that ride bicycles to make sure that nobody is left behind.
